Siberian Pea Shrub

Caragana

Description:

A great accent plant with a ferny weeping form and elongated pod-like brown and green fruits. The pollen formed from this tree/shrub causes mild allergens.

Common Name: Siberian Peashrub, Pea Tree, Weeping Pea Tree

Botanical Name: Caragana

Type: Deciduous shrub/tree

Soil Preference: Tolerates drought and salt and will grow in dry soils but prefers well-drained/loamy, sandy or clay soils with a pH of acidic to alkaline

Light Requirements: Full sun, partial sun, partial shade

Attributes: Pest tolerant, weeping form

Pests: Mainly pest tolerant

Diseases: None known.

Care: Can be pruned into a small tree or left alone to develop into a full shrub. Fertilize with Holly-tone, Plant-tone or a water-soluble fertilizer at the recommended rates.
